Kyiv, Ukraine

I am a web developer who has been creating websites since 2009. I specialize in creating landing pages, corporate websites, online stores, and more using CMS Joomla. In my work, I incorporate search engine optimization and accessibility standards (W3C, WCAG).

EXPERIENCE

Web-developer (2012-2023)
### «KNUCA» / Kyiv, Ukraine

Development of websites on CMS Joomla: Development of technical specifications, creation of design concepts, template layout, integration and configuration of functional tools into the content management system, and deployment of the site on the server.

Technical support of websites: Content updates, regular technical audits to identify and eliminate errors, upgrading components of the website structure as needed, ensuring uninterrupted operation of websites, server administration, regular backups of websites and databases, and restoring them if necessary.

Junior SEO (2011-2012)
«Global Vision» / Kyiv, Ukraine

Worked on search engine optimization of about 40 websites of various topics. As a result, most of them got into the top 10 of Google Search.
